

“Speech pathologists’ access and use of aphasia therapy resources: An exploratory international survey”

If you are a speech pathologist working with people with aphasia we want to know:

- How you access and choose your aphasia therapy resources; and
- What you perceive to be barriers and facilitators to accessing aphasia therapy resources in your clinical practice.

This research will be used to inform the development of the Aphasia Therapy Finder, a searchable database of common aphasia therapies with high level evidence.

Who? Speech Pathologists working with people with aphasia.

What? Your participation will involve completing a short, online survey (10-30 minutes).
The survey is written in English.

If you would like to participate in this online survey being conducted by the Collaboration of Aphasia Trialists (Working Group 4), please click on the [link](#) or contact Dr Jade Dignam j.dignam@uq.edu.au
